At WWDC 2009, the new laptop comes with better battery, on a single charge it lasts upto 7hrs now you can be re-charged upto 1000 times, compared with other laptop batteries. A sexy aluminum body and also includes LED-Backlit display, Multi-touch trackpad, illuminated keyboard, SD card slot and ofcourse a better processor.

If you purchase MacBook Pro without Snow leopard OS, you can get the upgarde package about around

Checkout the prices
