Wolfram|Alpha is a computational engine, it provides answers in a formal knowledge to user questions. The product will contain data in various fields like Mathematics, Life Sciences, Earth Sciences, Statistics & Data Analysis, Technology etc.

You can question I can search on Google, Yahoo answers, and in other search engines, Why should I go for WolframAlpha ?

Its very simple, the quickest answer is they fetch the related data like related documents, pdf's, a page where the search string is been used or so.

Jst give a try you'll come to know what is WolframAlpha is all about <http://www.wolframalpha.com/>
