Dear Sudheer,

It's still the early days for BI and DW in the cloud, but a number of interesting trends have arisen. What are these trends and how will they affect cloud BI/DW in the short and long term?

On August 24, join Philip Russom for a Webinar focused on trends in clouds for BI. You'll learn what is driving BI tools and DW platforms onto clouds, when to deploy BI/DW on a private cloud versus a public one, and much more.

Live Webinar: Trends in Clouds for Business Intelligence

When: August 24, 2011, 9:00 a.m. PT

Register now or save time and register for multiple Webinars.

You will learn:

Trends driving BI tools and DW platforms onto clouds

Trends in preferred use cases for clouds as platforms for BI and DW

When to deploy BI/DW on a private cloud versus a public one

Where the trends toward clouds will lead BI/DW in the short and long term

This Webinar has limited capacity and will fill up quickly, so register early to ensure your spot.

Trends in Clouds for Business Intelligence

To your success,

TDWI
