

## What's new in BODI 11.7 Accelerated

by Sudheer Sharma - Tuesday, February 24, 2009

<http://dwhnotes.com/data-integrator/whats-new-in-bodi-117>

What do you think of this post?

[Awesome \(0\)](#) [Interesting \(1\)](#) [Useful \(0\)](#)

Many points to discuss, but i will write few points that's what I have observed so far....

### New Transformations

- Data\_Transfer
- Data Quality transformations are no longer exist

Enhancements in some transformations like

- Run as seperate process
- History Preserve valid to dates
- Can pass variables in some transformation options rather than selecting default options /manual inputs

### New Functions

- cast()
- wait\_for\_file()
- count\_distinct()
- asc(), chr()
- sqrt(), log(), power()
- previous\_row\_value()
- gen\_row\_num\_by\_group()

Enhanced few previous functions also

## **New Functionalities**

- Excel fileformat
- Loadbalancing
- Datastore support for Federator, Persistent Cache
- Pageable Cache
- Password Mgmt
- Performance monitor to identify bottle necks
- Enhanced Job Scheduling options (Now, one can execute a job multiple times in a day)

**DI Admin + Metadata Reports (we can see both the applications are in one interface) = Management Console**
